

Disinfection Mats

Features:

- Low-cost disinfection alternative
- Ideal for entrances to disease-sensitive premises
- Quality construction
- Suitable for any type of disinfection liquid

Product Information:

Following experience gained from development and use of our Hoofmat for lameness treatment, our high quality Disinfection Mats are now in high demand around the world for human use at

entrances as a biosecurity measure. These mats feature a permeable upper fabric which enables disinfection of footwear, or anything else crossing it (dogs, carts, etc.). Bottom and sides are of non-permeable material to prevent leakage or leaching of disinfection solution.

Simply pour solution on top of mat to fill. All mats are 30mm thick, with a core of bonded urethane foam. To clean, place on edge and hose off. Leave to drain. Disinfection Mats can be used with any disinfectant or sanitizer.

Code	Product
217 600	Disinfection Mat 85 × 180cm blue
217 596	Disinfection Mat 85 × 60cm blue
217 599	Disinfection Mat 85 × 85cm blue
