

# Konk Air Guard

## Features:

- Killer and deterrent for flies & insects
- Ideal for household or commercial use
- Administers puff every 8 minutes
- Natural pyrethrum (from chrysanthemum)

## Product Information:

Konk Air Guard gives a tiny puff of aerosol every 8 minutes to completely control all flies, ants, fleas, mosquitoes and cockroaches. It is so effective that just one unit is all that is required in an average 120sq.m home or workplace. Air

Guard will do this without using any powerful chemicals. The active ingredient is pyrethrum, which is a non-residual, 'household' type natural insecticide obtained from the chrysanthemum flower. Air Guard has the following advantages: it is portable, can be turned off/on as required, great in food establishments, no effect on asthmatics or people prone to allergies. It's a deterrent as well as a killer. Ideal for homes, restaurants, offices, poultry sheds, piggeries, stables, green houses, etc.

Kit includes your first can of Konk.
