

Aesculap Bonum Cattle Clipper

Features:

- Lightweight, ergonomic design
- 80min run time
- 55min recharge time
- Quiet noise level

Product Information:

The Bonum Cattle Clipper boasts the latest in Aesculap cutting technology. Manufactured in Germany, the clipper weighs only 900gm including the battery and blade. The body of the clipper is ergonomically—designed with a 4cm diameter for ease and

manageability, and a total length of 29.5cm. The Bonum has a comfortable noise level at just 65dB and a running time of 80mins per battery. The recessed electronic push button reduces risk of accidental switching on or off during handling.

The Lithium-ion technology prevents overheating and clipper will switch off when temperature reaches >50 degrees Celsius. Clipping load is sensed and the battery output is adjusted accordingly, thus prolonging the life of the battery and enhancing cooler, quieter operation. LED displays provide battery status information on the charger.

A selection of clipping blades are available.
