

Lamb Tail Docking Iron

Features:

- Minimises lamb losses
- Reduces lamb stress
- Easy to assemble and use
- Two minute pre-heat time

Product Information:

An Australian designed heated blade for lamb tail docking. Minimises lamb losses through improved mothering time. Also reduces lamb stress and blood losses, and enhances quicker healing.

Extensively field tested and proven to be fast, easy to use and highly efficient. Easy assembly and lighting. Connect to a portable LPG cylinder (not included) by way of a 3M hose and POL Cylinder Adapter. Two minute pre-heat time. Takes just two seconds per average tail. Skin will start to cover the wound in a matter of hours. Keep the blade clean with the wire brush included. TIP: Work with the gas bottle off the ground to avoid lambs tangling with the hose. A 44 gallon drum is ideal for this purpose and is also a convenient place to rest the hot iron.
