

Vink Bedding Spreader

Features:

- Spread bedding or additives over large areas
- Powered by cordless drill (not supplied)
- Easily control output
- Strong corrosion-free plastic construction

Product Information:

From Vink, Holland, this device is very useful for

adding material to bedding in housing or barns, for everything from cattle to pigs to chickens. The spreader is powered by a cordless drill (not supplied). It will spread most bedding materials and/or additives. Additives can be pre-mixed with sawdust to give good spread over large areas. The bedding spreader will spread lime if mixed up to 50% with sawdust. The output can be controlled. Strong corrosion-free plastic construction. User is clear of dust throw. A shoulder strap carries the weight of the spreader. Capacity 10kg. NB: Drill is not supplied with spreader.
