

# Genia Cosypad

## Features:

- Versatile: multiple uses and applications within clinics.
- Non-absorbent: it allows liquids to pass through the mat, leaving the animal dry.
- Non-slip material ensures stability: the Cosypad® is ideal to use on your consult or surgery tables.
- Easy to clean: Cosypad® is machine washable (up to 40°C).

## Product Information:

The Cosypad is a non-absorbent mesh mat that provides hygiene and comfort for your animals.

It is made from a new generation mesh pad used in human medicine to prevent bed sores.

The Cosypad is non-absorbent allowing liquids to pass through the mat, leaving the animal dry. Perfect to use in your cages for incontinent patients or when

waking up from GA's. It minimises pressure on muscles and joints, and prevents bedsores, making it ideal for hospitalised patients.

Thanks to its anti-slip layer, the Cosypad is ideal to use on your consult or surgery tables. The meshed material provides optimal comfort and ventilation, as well as a thermal barrier to cold tables.

The small Cosypad makes a great dental mat: place the head of the animal on top of the mat while descaling, and let liquids drain through.

Tired? Use your Cosypad® as an anti-fatigue mat!

Last but not least...

Easy to clean: Cosypad® is machine washable (up to 40°C) and dries quickly even in winter.

Chew & stain resistant: Cosypad® is meant to last a few years!

Code	Product

# Genia Cosypad

## Product Information:

Cosypop is a multi-purpose surgical and recovery bed, designed to meet the demanding needs of veterinary surgeries and post-operative care. Crafted with precision and using the renowned Cosypad technology, the Cosypad is a seamless blend of functionality and comfort. Ideal for surgeries, recoveries, cages, tables and procedures.

### DENISTONE VETERINARY SURGERY

Dr William Jenkinson

"I use the Cosypad® as a covering for the consulting table during examinations and find them very useful. Both dogs and cats are happy to stand and sit on them, they are non slip so they stay in place and are easily washed at the end of the consulting period. I also find them useful when placed under patients having dental procedures to help with drainage of water away from the patient. Cosypad® are also durable, I have six of them and they all remain in excellent condition.

### SUPERVETS, MANLY WEST & HENDRA

Dr Anthony Cassimatis

We want our patients to be comfortable and warm and are always looking to improve hospital care and efficiencies when dealing with bodily excrements. When Genia introduced their new "Cosypads" we trialed them, and within weeks filled every cage in two 24hr hospitals with them as routine. Now every patient has a comfortable non slip bed which keeps them off cold surfaces and prevents urine scalding. Being hygienically washable means we have drastically reduced our use of towels and the costs of washing as a consequence. We have also found them particularly useful as a non-slip surface in consult and prep benches, and routinely use them as the resting surface for patient heads during dental procedures, with pee pads underneath keeping their face far cleaner. Very useful in the car too ! We absolutely love them! :)

## Ideal for:

Consultation  
tables

Surgery  
tables

Dental  
Procedures

Cages
